

SHORT COURSE

Introduction to **Petroleum Systems**

the importance of time, heat and organic matter for oil and gas formation
Monday & Tuesday 11 & 12 August

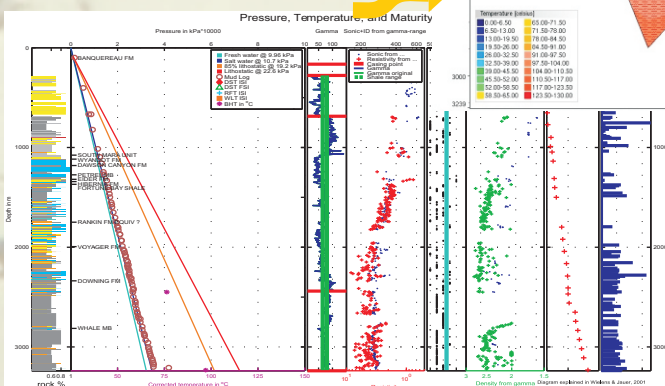

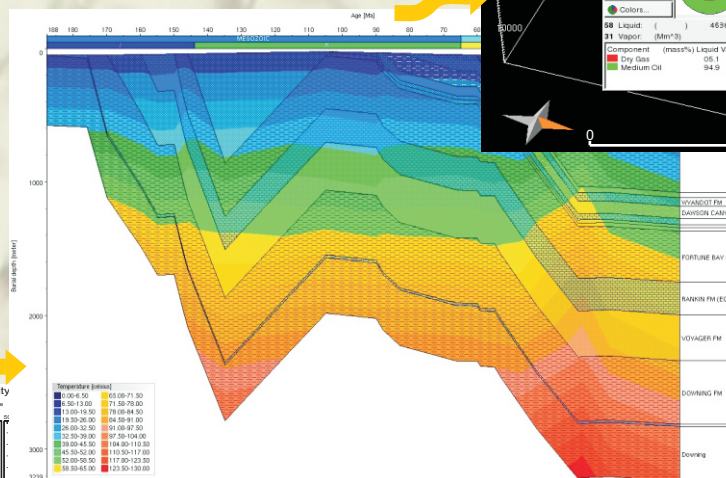

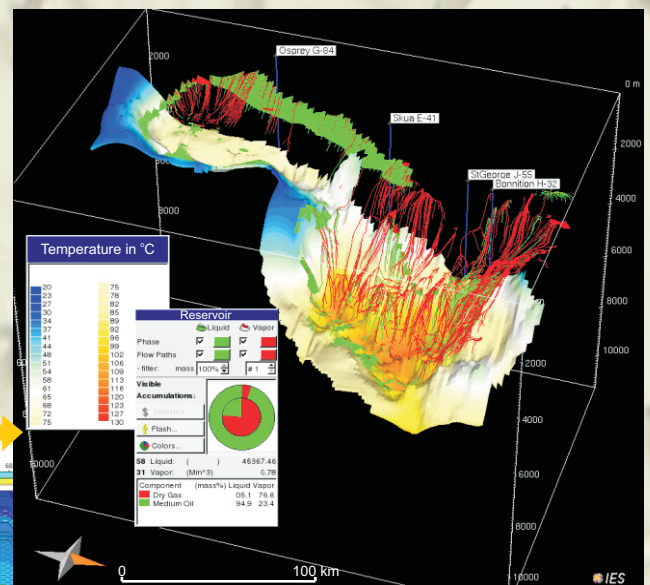

Instructors:

**Marcos Zentilli², Hans Wielens¹,
Keith Louden² & Graham Williams¹**

¹Geological Survey of Canada, Atlantic

²Dalhousie University, Halifax, NS

Thermal Regimes in Basins,
Organic Geochemistry and Heat
Time Constraints and Biostratigraphy
Seismic Stratigraphy in Petroleum Modelling
Thermochronology and Time-temperature Modelling
1D, 2D and 3D Modelling
Hands-on Exercises with 1D Petromod[®]
Printed and digital notes
Certificate of completion
